

# Phoenix AirMax 50Hz

## Radial Air Mover

### At 1274m<sup>3</sup>/hr and .6 Amps - Best-in-Class

The Phoenix AirMax is the new leader in performance, convenience, portability, and safety for low profile air movers.

Its compact 52cm X 43cm footprint and 23cm height make the Phoenix AirMax the most compact and portable fan in its class. The rugged molded in handle gives you the solid control required when packing and unpacking lots of air movers. Its easy-winding cord wrap and multiple securement options makes it a snap to prep for transport. Because of its deeply-molded interlocking features, the Phoenix AirMax is rock solid when stacked for transport.

With its Patent Pending, motor support x-bracket and optimized outlet shape, the Phoenix AirMax delivers airflow of 1274 m<sup>3</sup>/hr. This gives you high velocity air over a 25% larger area than other low profile air movers. In addition, the Phoenix AirMax is stable in all 4 drying positions to maximize flexibility.

The Phoenix AirMax is the safest fan in its class; where competitors position high voltage electrical connections low to the floor, the leading edge design of the Phoenix AirMax allows these connections to be located more than 4 times the minimum required height. The Phoenix AirMax is built to keep the contractor and their customers safe.

MADISON, WISCONSIN

Patent Pending

©Technologies Holdings Corp.

Phoenix now offers this unit in both Red and Blue

**Xactimate Code:**  
**WTRDRY**

### Features

- 1274 m<sup>3</sup>/hr
- 0.6 Amps
- Ultra secure stacking and cord wrap
- Heavy wall polypropylene housing
- 7 M Power Cord
- Light weight 9.5 kg
- CE Mark
